

Industry Focused Additive Manufacturing (AM) Course

Learn New Skills: Enroll in the 3D Printing Course

1 Credit 15 Hours of Learning

- Understand the wide range of processes available in AM.
- Glimpse of the global AM scenario through various case studies and understand the industrial drivers of AM.
- Analyse the implications of each technology and the generic process flow.
- Conclude with a brief exercise applying the learnings.

2 Credit 30 Hours of Learning

- All the topics covered in the one credit course.
- In-depth coverage of each step in the AM process flow.
- Detailed training in digital workflow that makes students familiar with industrial practices.
- Apply the learnings in a project at the end of the course.

3 Credit 45 Hours of Learning

- All the topics covered in the two credit course.
- Delve into the Design for AM (DfAM) through hands-on exercise sessions.
- Understand the process selection applied to identify parts for AM, to prepare the students for the industry.
- Design project is included in the course.
